

Bruce Power hosts international HPRCT Conference in June 2008; First time in Canada

Bruce Power, Canada's first privatized nuclear generating company, is honoured to host the 2008 HPRCT Conference on nuclear industry human performance—the first time this conference will be held in Canada.

The 14th Annual Human Performance-Observations/Root Cause/Corrective Action/Trending/Self-Assessment/Operating Experience Conference (HPRCT) will be held in Mississauga, Ont. June 16-20, 2008 at the Delta Meadowvale Resort and Conference Centre.

“We're thrilled to host this best-practice leadership event,” says Conference host and Bruce Power employee Terry Bartley. “The theme of the workshop is Get it Straight 2008 – a hands-on, how-to, shop-floor network designed especially for the human performance practitioner.”

Human performance should be continually improved, even in those organizations with well established programs, says Jack Martin, President, HPRCT. “This Conference will focus on strategies to achieve superior event-free performance.”

More than 150 international delegates will attend from world-wide industries, including nuclear, medical and aviation. Industry leaders from Canada, the United States, the United Kingdom and Europe will deliver multi-faceted programs including human factors design tools, organizational factors and safety culture, knowledge management and performance management.

For more information about the HPRCT Conference please visit www.hprct.org.

About Bruce Power:

Bruce Power is Canada's first private nuclear generating company providing 20 per cent of Ontario's electricity. Located approximately 250 kilometres northwest of Toronto, the company presently operates six reactor units and is restarting two more. With eight reactors on-line, total output will exceed 6,200 megawatts of emissions-free electricity. www.brucepower.com
