

BIOGRAPHY

Frank Saunders Vice President, Regulatory Oversight

Frank Saunders has over 25 years of experience within the nuclear industry, including positions in technical support, operations, emergency preparedness, security, quality assurance, management system, oversight, and regulation. Frank joined Bruce Power in 2001 and has held three senior positions, including his current role as Vice President, Regulatory Oversight. In this position, Frank is responsible for environmental performance, nuclear safety oversight and regulatory affairs.

For 13 years, Frank held a variety of management positions at several Ontario Hydro Nuclear (OHN) facilities, including Bruce Nuclear Power Development. His last four years with OHN were spent organizing and performing nuclear plant safety evaluations, including a two-year assignment with the Institute of Nuclear Power Operations (INPO).

Prior to joining Bruce Power, Frank held the position of Director, Nuclear Operations and Facilities at McMaster University. As a senior operating authority, Frank directed operations at the McMaster Nuclear Reactor, McMaster Accelerator Facility, Nuclear Research Building Laboratories and support facilities.

Until 1982, Frank was a commissioned officer in the Canadian Armed Forces from which he retired after twelve years of service.
